EDUCATION

National Autonomous University of Mexico (UNAM)

High School Diploma

Mexico

August 2021 – April 2025

PROJECTS

SecureApp | *JavaScript, TypeScript, React, Google Cloud Platform*

April 2022

- Developed a security suite for communities, winning "Best use of Google Cloud" challenge
- Resulted in enhancing community security and recognition in a hackathon

Bread | *C, Assembly x86*

November 2021 – July 2022

- Contributed to the development of a dependency-free operating system in Assembly x86 and C
- Resulted in gaining valuable low-level programming experience

Hackipups | *React, UI/UX design*

October 2022 – May 2023

- Engaged in front-end development, UI/UX design, and idea development
- Resulted in ongoing project development and skills enhancement

EarthHopper | *Python, GPT language models, React, Next.js*

July 2023

- Promoted sustainable travel practices using Python, GPT language models, Google Maps API, React, and Next.js
- Resulted in contributing to sustainable travel initiatives

ACCOMPLISHMENTS

Three-Time Hackathon Winner

Demonstrated problem-solving skills and innovation by winning three hackathons, designing applications oriented to ease of use and eye-catching, modern designs.

Speaker at UNAM's Escuela Nacional Preparatoria for Cybersecurity

Shared cybersecurity expertise as a speaker, contributing to knowledge dissemination.

Organizer (Web Developer & Co-Lead) at ClockHacks

Led as a co-lead and web developer, contributing to the success of ClockHacks, a hackathon with over 10 projects submitted and \$5,880 USD in prizes.

Workshop Host: Introduction to Web Development

Conducted workshops introducing web development, fostering learning among participants.

SKILLS

Languages: JavaScript, TypeScript, C/C++, Assembly

Frameworks: React, Express, NodeJS

Developer Tools: Docker, Google Cloud Platform (GCP), Amazon Web Services (AWS), Linux, Git
